

Resolution presented by the delegation of the Republic of the Sudan

Republic of the Sudan

Theme Political and Social Rights

Concern Equal accessibility of COVID-19 vaccines around the world

The General Assembly,

Witnessing that people are suffering and dying from COVID-19 due to a low rate of vaccinated people in the continent of Africa,

Observing a lack of knowledge about vaccinations and the received vaccination doses being too close to the expiry date,

Considering the lack of vaccinated people will delay the the extermination of the Corona virus and will enable the virus to mutate and spread again,

Fearing that the pandemic will extend and cause more deaths and a global, irreversible economic crisis,

Decides to demand help from other nations with a efficient vaccination progress that will fight the pandemic internationally.

- By providing African countries with newly produced vaccination doses that are not close to the expiry date
- By raising the number of donated vaccination doses
- By offering culture-specific education about vaccines
- By making vaccinations more accessible for the entire population
