

Resolution presented by the delegation of Mauritania

Theme Political and Social Rights

Concern Food access to everybody in the country

The General Assembly,

Knowing about the widely spread and impacting food insecurity in many countries such as Chad, Ethiopia and Madagascar due to a lack of rain fall in the past years,

Witnessing how climate change is causing droughts, destroying our food crops and therefore causing a lack of food resources in our countries is making us

Fear for our own safety and that of our country regarding our strongly minimized food resources, which is largely the consequence to the growing climate change , therefore we need to start

Realizing what our current problem is and where we need to start working on, climate change and how to adapt our food plantations to our needs, our

Decides are
-to ask the United Nations to invest in environmental friendly energy sources like solar, wind or water
-donate and support to suffering countries to help us build high-rise plantations and water systems for watering the crops
-battle climate change by cutting down on c02 and setting stricter rules globally.
