

RESOLUTION XV – STATE OF ISRAEL

THEME : CONFLICTS AND INTERNATIONAL SECURITY

CONCERN : FOR THE WORLDWIDE SECURITY OF NUCLEAR POWER

THE GENERAL ASSEMBLY,

- Deplores the actions of the Islamic Republic of Iran concerning the Joint Comprehensive Plan of Action on Iranian nuclear power,
- Observes that the Islamic Republic of Iran has hidden its true intention of upholding an active nuclear program, a fact having been proven by Iranian secret archives whose content has been successfully verified by the State of Israel,
- Alarmed to see the threatening messages of the Supreme Leader of Iran, hostile to the regional security of the Middle East and to the State of Israel, entailing a considerable risk to the regional and world stabilities,
- Commends the withdrawal of the United States of America from the Joint Comprehensive Plan of Action as a reaction to the lack of collaboration from the Islamic Republic of Iran,
- Recalls the defensive capacity of Israel in the event of a hazardous and thwarted development of the aforementioned facilities,
- Decides the implementation of a thorough and credible investigation led by several signatory countries of the Joint Comprehensive Plan of Action, overseeing and contributing to the IAEA's (International Atomic Energy Agency) work on Iran's nuclear facilities, in order to shed light on the abovementioned program, with the ultimate goal of preserving the current agreement, knowing that:
- the report of this investigation should present concrete solutions to the problems that can potentially be discovered, so that the resulting discoveries do not fall into oblivion;
 - IAEA inspectors will have to be sent to the local regions, specifically in case where Iran does not respect the agreement, so as to ensure a lasting peace in the region by preventing a new nuclear power from emerging.
