

# RESOLUTION – REPUBLIC OF ESTONIA

THEME : CONFLICTS AND INTERNATIONAL SECURITY

CONCERN : THE CREATION OF THE INTERNATIONAL AGENCY AGAINST CYBERCRIME

THE GENERAL ASSEMBLY,

- Noting that cybercrime had already generated a loss of 445 billion \$ in 2014 according to McAfee, which now amounts to 600 billion \$, or 0.8 of global GDP, 25% of which is due to intellectual property theft, and 40% of which is invested in computer defence,
- Alarmed by the rise in cybercrime rates, with 47% of attacks targeting the health sector, stealing confidential patient data and then using it as a means of pressure for ransom, and another 39% targeting the financial sector in recent years,
- Deploring the lack of solidarity of governments with regard to computer protection,
- Emphasizing its omnipresence and our growing dependency on the internet in today's world,
- Decides to establish an International Agency against Cybercrime (IAAC) which will be neutral and under the leadership of the Republic of Estonia given its knowledge and extensive experience in the field which will be funded by all beneficiary states from IAAC services according to their economic situation and GDP ;
- In addition, the IAAC will benefit from a team of experienced cybercriminals who have been arrested by law enforcement and who will, at the same time be reintegrated into the society ;
